Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6 and 13-25, drawn to formwork assembly with side form support member and side form member.

Group II, claim(s) 7-12, drawn to surface to member securing device.

Group III, claim(s) 26, drawn to method of assembling a formwork.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I lies in side form members and side form support members with inter-member securing device. The special technical feature of Group II lies in a base plate with clamping element. The special technical feature of Group III lies in connecting adjacent members via clamping devices.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

There are five Groups of species from which Applicant must elect.

Group I, (as to surface to member securing device): Fig. 8; Fig. 10; Fig. 11; Fig. 27; Fig. 33; Fig. 40.

Group II, (as to linking device): Fig. 22a; Fig. 24a/24b; Fig. 25.

Group III, (as to inter-securing device): Fig. 17/18a; Fig. 18b; Fig. 19.

Group IV, (as to shaping inserts): There are seven different shaping inserts within Fig. 3b from which Applicant must elect. For purpose of restriction, they will be listed starting from top left to right continuing through bottom left to right as Fig. 3b1; Fig. 3b2; Fig. 3b3; Fig. 3b4; Fig. 3b5; Fig. 3b6; Fig. 3b7.

Applicant is required, in reply to this action, to elect a single species from each of the above listed Groups of species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Instantly, all claims appear to correspond to all species within each Group of listed species.

The following claim(s) are generic: 1-26.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the designated species *within each*

listed Grouping are mutually exclusive one from another with the features of one species lacking the technical feature of the other species.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
